Process & Decision Documentation

Project/Assignment Decisions

Side Quests and A4 (Individual Work)

Edited Minecraft Side Quest 6 to include a debugging screen with controls for testing game mechanics against the environment. I modified the dashboard to include pressing ‘1’ for Boar Probes, ‘2’ for Colliders, ‘3’ for Invincible, and ‘4’ for Win Score = 1. Specified values change upon input from OFF to ON in the Minecraft platform game.

Default game:

Modified game with debugging:

Code Changes

Added debug flags
